INTRODUCTION

Project overview: Food wastage is a serious challenge in today's world, where large quantities of edible food are thrown away while millions struggle with hunger. This project focuses on creating a Salesforce CRM-based solution to efficiently manage leftover food collection and distribution. The application connects restaurants, donors, volunteers, NGOs, and drop-off points into a single streamlined system. Using custom objects, workflows, triggers, and dashboards, the process of tracking, transporting, and delivering food becomes automated and transparent. The project proves how technology can reduce wastage, ensure timely delivery, and contribute towards building a hunger-free society.

Objectives:

- Enhance Food Distribution Efficiency: Ensure fast and smooth tracking of leftover food collection and delivery, so that needy people receive food on time.
- Improve Volunteer Coordination: Automate volunteer scheduling, notifications, and task allocation, reducing manual effort and confusion.
- **Ensure Transparency:** Maintain accurate records of donors, recipients, and distribution details, which improves trust and accountability.
- Optimize Resource Management: Monitor surplus food inventory, allocate it properly, and minimize unnecessary wastage
- Enhance Real-Time Visibility: Provide live updates of food availability, delivery status, and tracking for donors, volunteers, and receivers.
- Promote Social Impact: Build a transparent and efficient system that motivates donors
 and volunteers to contribute actively for society.

Student outcomes:

- Hands-on Experience: Students practice Salesforce configuration, workflow automation, and real-time tracking, gaining technical knowledge through practical application.
- **Project Lifecycle Knowledge:** They learn the complete CRM project process from requirement gathering to deployment, preparing for real-world Salesforce projects.
- **Problem-Solving Skills:** Students develop the ability to identify food distribution challenges, design effective solutions, and troubleshoot technical issues.
- Collaboration Skills: By working as a team, students gain experience in requirement gathering, development, and testing with better coordination.
- **Industry Exposure:** They understand how Salesforce CRM is applied in social good projects, building confidence for future career opportunities.
- Communication Skills: Students improve their communication while interacting with NGOs, donors, and volunteers, as well as while presenting project reports.
- Social Responsibility: They learn the importance of reducing food wastage and how technology can support society through innovative solutions.

System Requirement:

Hardware Requirement:

- Computer with min/sum 4 GB RAM, Dual-core processor
- Stable internet connection

Software Requirement:

- Salesforce Developer Edition Org
- Modern Web Browser (e.g., Google Chrome, Firefox)

Project Duration: 30 Hours;

Phases Overview:

Phase	Phase Name	Description	Page
No:			Numbers
	Requirement Analysis &	Gathering requirements from donors,	
1	Planning	volunteers, and receivers; defining	5
		scope and goals; planning data model	
		and workflows.	
	Salesforce Development –	Creating custom objects, fields,	
2	Backend &	relationships; setting up Flows and	5 - 12
	Configurations	Apex Triggers for automation	
	UI/UX Development &	Building Lightning App, customizing	
3	Customization	layouts, adding fields, implementing	12 - 28

	Deployment,	Designing and finalizing Home Page,	
5	Documentation &	deploying solution to live	38 - 43
	Maintenance	environment, preparing	
		documentation, conclusion, and	
		ongoing system maintenance.	

Phase 1: Requirement Analysis & Planning: -

To Supply Leftover Food to Poor:

Utilizing Salesforce, our project streamlines surplus food collection and distribution to the needy, ensuring efficiency and transparency.

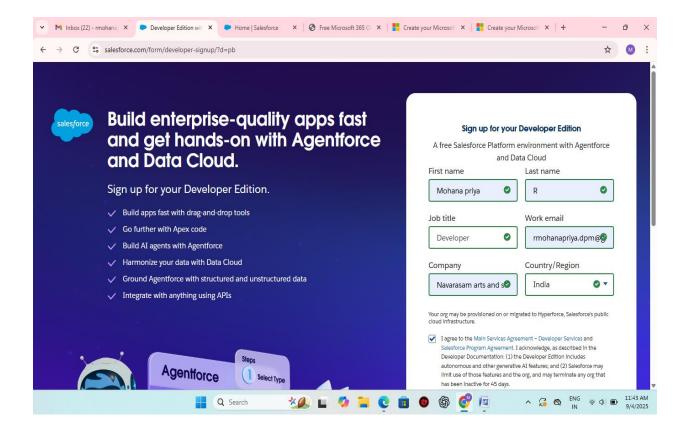

Phase 2: Salesforce Development – Backend & Configurations: -

Milestone 1: Salesforce developer account creation

Activity 1: Creating Developer Account

Steps to Create a Salesforce Developer Org

1. Go to https://developer.salesforce.com/signup

2. Fill the signup form with:

• First Name & Last Name

• Email ID

• Role: Developer

• Company: College/Company Name

• Country: India

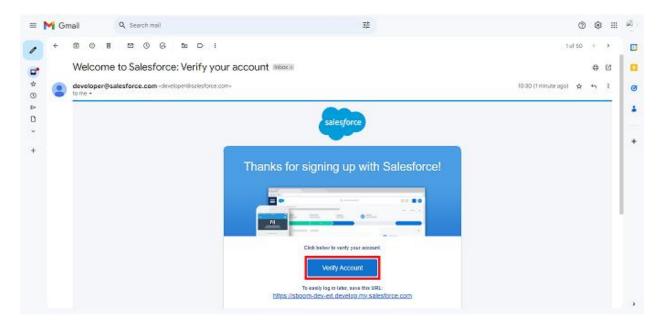

• Postal Code: Your PIN Code

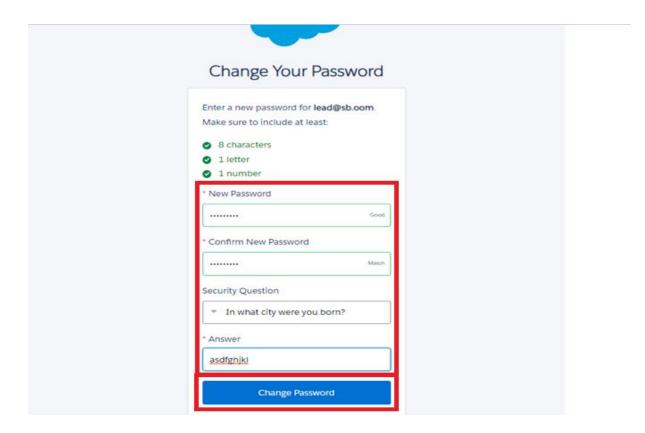

• Username: should be a combination of your name and company

3. Click Sign Me Up to complete the registration.

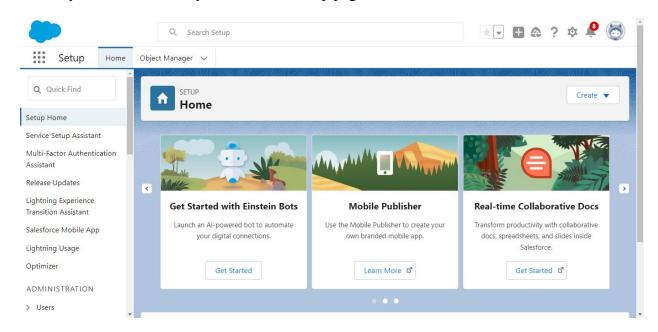

Activity 2: Account Activation

1. Go to the inbox of the email that you used while signing up. Click on the verify account to activate your account. The email may take 5-10mins.

- 1. click on Verify Account
- 2. Give a password and answer a security question and click on change password.
- 3. Then you will redirect to your salesforce setup page.

Milestone 2: Object: -

To Navigate to Setup page:

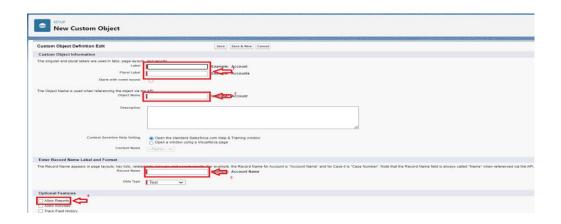

To create an object:

1.From the setup page > Click on Object Manager > Click on Create > Click on Custom Object.

- 2.On Custom object defining page:
- 3. Enter the label name, plural label name, click on Allow reports, Allow search.

4.Click on save.

Activity 1: Create Venue Object: -

- 1. Go to Setup → Object Manager → Create → Custom Object
- 2. Enter:
 - a. Label Name: Venue
 - b. Plural Label: Venues
 - c. Record Name: Venue Name (Data Type: Text)
- 3. Select:
 - a. Allow Reports
 - b. Track Field History
 - c. Allow Activities
 - d. Allow Search
- 4. Click Save.

Activity 2: Create Drop-Off Point Object: -

- 1. Go to Setup → Object Manager → Create → Custom Object
- 2. Enter:
 - a. Label Name: Drop-Off Point
 - b. Plural Label: Drop-Off Points
 - c. Record Name: Drop-Off Point Name (Data Type: Text)
- 3. Select: Allow Reports, Track Field History, Allow Activities, Allow Search
- 4. Click Save.

Activity 3: Create Task Object: -

- 1. Go to Setup → Object Manager → Create → Custom Object
- 2. Enter:
 - a. Label Name: Task
 - b. Plural Label: Tasks
 - c. Record Name: Task Name (Data Type: Text)
- 3. Select: Allow Reports, Track Field History, Allow Activities, Allow Search
- 4. Click Save.

Activity 4: Create Volunteer Object: -

- 1. Go to Setup \rightarrow Object Manager \rightarrow Create \rightarrow Custom Object
- 2. Enter:
 - a. Label Name: Volunteer
 - b. Plural Label: Volunteers
 - c. Record Name: Volunteer Name (Data Type: Text)
- 3. Select: Allow Reports, Track Field History, Allow Activities, Allow Search
- 4. Click Save.

Activity 5: Create Execution Details Object: -

1. Go to Setup \rightarrow Object Manager \rightarrow Create \rightarrow Custom Object

2. Enter:

a. Label Name: Execution Detail

b. Plural Label: Execution Details

c. Record Name: Execution Detail Name (Data Type: Text)

3. Select: Allow Reports, Track Field History, Allow Activities, Allow Search

4. Click Save.

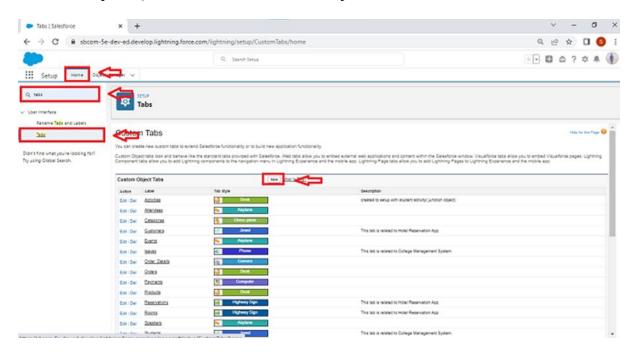

Milestone 2: TABS: -

What is Tab: A tab is like a user interface that is used to build records for objects and to view the records in the objects.

Activity 1: Creating a Custom Tab: -

To Create a Tab (Venue)

1. Go to Setup \rightarrow Quick Find: Tabs \rightarrow Custom Object Tabs \rightarrow New

- 2.Select Object: Venue → Choose Tab Style
- $3.\text{Next} \rightarrow \text{Keep default for profiles}$
- 4. Next \rightarrow In Custom App, uncheck *Include Tab*
- 5. Ensure Append tab to users' existing personal customizations is checked

6. Click Save.

Activity 2: Creating Remaining Tabs: -

Now create the Tabs for the remaining Objects, they are "Drop-Off Point, Task, Volunteer, Execution Details". 2. Follow the same steps as mentioned in Activity -1.

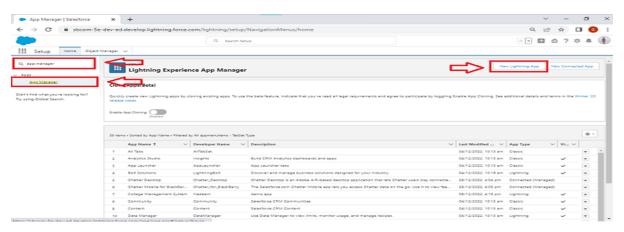

Phase 3: UI/UX Development & Customization:

Milestone 4: THE LIGHTNING APP: -

Create a Lightning App:

To create a lightning app page

1. Go to Setup → App Manager → New Lightning App

2. Enter:

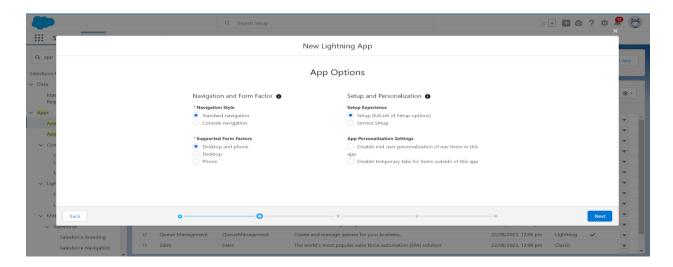

• App Name: Food Connect

• Developer Name: Auto populated

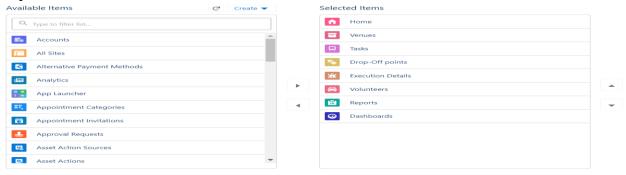

Image: Optional

• Primary Color: Default

3. Next → Set Navigation Style: Standard Navigation

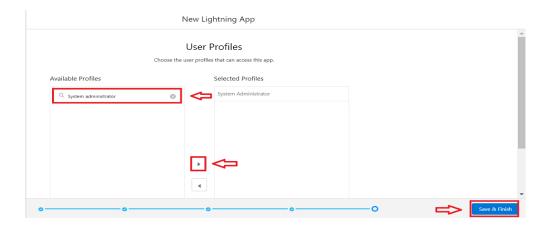

- 4.Utility Items: Keep default → Next
- 5.Add Navigation Items: Home, Venue, Drop-Off Point, Task, Volunteer, Execution Details, Reports \rightarrow Next \rightarrow

Next

Add User Profiles: Select System Administrator → Save & Finish

Milestone 5: FIELDS: -

Activity 1: Creation of Relationship Fields in Object: -

Creation of Lookup Relationship Field on Volunteer Object:

1. Go to Setup → Object Manager → Volunteer

- 2. Click Fields & Relationships → New
- 3. Select Master-Detail Relationship
- 4. Related Object: Drop-Off Point → Next

- 5. Field Name: **Drop_Off_point** (Label auto-generated)
- 6. Click Next \rightarrow Next \rightarrow Save

Creation of Master Detail Relationship Field on Execution Details Object:

- 7.Setup → Object Manager → Execution Details
- 8.Fields & Relationships → New → Master-Detail → Volunteer

9. Field Name: Volunteer \rightarrow Save

Creation of Master-Detail Relationship Field on Execution Detail Object:

- 10. Setup → Object Manager → Execution Details
- 11. Fields & Relationships \rightarrow New \rightarrow Master-Detail \rightarrow Task
- 12. Field Name: Task \rightarrow Save

Creation of Lookup Relationship Field on Drop-Off Point Object:

- 13. Setup \rightarrow Object Manager \rightarrow Drop-Off Point
- 14. Fields & Relationships \rightarrow New \rightarrow Lookup \rightarrow Venue
- 15. Field Name: Venue → Save

Creation of Lookup Relationship Field on Task Object:

- 16. Setup → Object Manager → Task
- 17. Fields & Relationships \rightarrow New \rightarrow Lookup \rightarrow Venue
- 18. Field Name: Sponsored By → Save

Creation of Lookup Relationship Field on Task Object:

- 19. Setup → Object Manager → Task
- 20. Fields & Relationships \rightarrow New \rightarrow Lookup \rightarrow Drop-Off Point
- 21. Field Name: Drop-Off Point \rightarrow Save

Activity 2: Creation of Fields for Venue Object: -

- 1. Setup \rightarrow Object Manager \rightarrow Venue \rightarrow Fields & Relationships \rightarrow New
- 2. Data Type: Email
- 3. Field Label: Contact Email
- 4. Required \rightarrow Save & New

- 5.Data Type: Phone
- 6. Field Label: Contact Phone
- 7. Required \rightarrow Save & New

To create another fields in an object:

- 8. Data Type: Geolocation
- 9. Field Label: Location
- 10. Decimal Places: 4
- 11. Description: Enter the Geolocation of your Venue
- 12. Save & New

To create another fields in an object:

- 13. Data Type: Long Text Area
- 14. Field Label: Venue Location
- 15. Field Name: Venue Location
- 16. Save & New

Activity 3: Creation of Fields for Drop-Off Point Object: -

- 1. Go to Setup → Object Manager → Drop-Off Point
- 2. Click Fields & Relationships → New
- 3. Select Data Type: Geolocation → Click Next
- 4. Fill details:
 - Field Label: Location
 - Field Name: Auto-generated
 - Description: Enter the Geolocation of the Drop-Off Point
 - Geolocation Options: Decimal
 - Decimal Places: 4

5. Click Next \rightarrow Next \rightarrow Save & New

To create another fields in an object:

- 5. Go to Setup \rightarrow Object Manager \rightarrow Drop-Off Point
- 6. Click Fields & Relationships \rightarrow New
- 7. Select Data Type: Formula → Click Next
- 8. Fill details:
 - Field Label: distance calculation
 - Field Name: distance_calculation
 - Formula Return Type: Number
- 9. Enter Formula: DISTANCE(Location 2 c, Venue r.Location c, 'km')
- 10. Click Next \rightarrow Next \rightarrow Save & New

- 11. Go to Setup \rightarrow Object Manager \rightarrow Drop-Off Point.
- 12. Click on Fields & Relationships \rightarrow New.
- 13. Select Data Type: Picklist \rightarrow Click Next.
- 14. Fill details:
 - Field Label: State
 - Field Name: State
 - Values: Enter each value in a new line (all Indian States & UTs):
 Andhra Pradesh

Arunachal Pradesh

Assam

Bihar

Chhattisgarh

Goa

Gujarat

Haryana

Himachal Pradesh

Jharkhand

Karnataka

Kerala

Maharashtra

Madhya Pradesh

Manipur

Meghalaya

Mizoram

Nagaland

Odisha

Punjab

Rajasthan

Sikkim

Tamil Nadu

Tripura

Telangana

Uttar Pradesh

Uttarakhand

West Bengal

Andaman & Nicobar (UT)

Chandigarh (UT)

Dadra & Nagar Haveli and Daman & Diu (UT)

Delhi [National Capital Territory (NCT)]

Jammu & Kashmir (UT)

Ladakh (UT)

Lakshadweep (UT)

Puducherry (UT)

• Check Required.

15. Click Next \rightarrow Next \rightarrow Save & New.

To create another fields in an object:

- 16. Go to Setup \rightarrow Object Manager \rightarrow Task.
- 17. Click on Fields & Relationships \rightarrow New.
- 18. Select Data Type: Number \rightarrow Click Next.
- 19. Fill details:
 - Field Label: Distance
 - Field Name: Distance
 - Length: 14
 - Decimal Places: 4
- 20. Check Required.
- 21.Click Next \rightarrow Next \rightarrow Save & New.

Activity 4: Creation of Fields for Task Object: -

- 1. Go to Setup \rightarrow Object Manager \rightarrow Task.
- 2. Click Fields & Relationships \rightarrow New.
- 3. Select Auto Number \rightarrow Next.
- 4. Fill details:
 - Field Label: Task ID
 - Display Format: TASK- {0}
 - Starting Number: 1
 - Field Name: Auto-generated
- 5. Check Required
- 6. Click Next \rightarrow Next \rightarrow Save & New.

- 7. Go to Task \rightarrow Fields & Relationships \rightarrow New.
- 8. Select Date \rightarrow Next.
- 9. Fill details:

- Field Label: Date
- Field Name: Date
- Check Required
- 10. Click Next \rightarrow Next \rightarrow Save & New.

To create another fields in an object:

- 11. Go to Task \rightarrow Fields & Relationships \rightarrow New.
- 12. Select Picklist (Multi-Select) \rightarrow Next.
- 13. Fill details:
 - Field Label: Food Category
 - Field Name: Food Category
 - Values

Veg

Non-Veg

Salad

Snack

- Check Required
- 14. Click Next \rightarrow Next \rightarrow Save & New.

To create another fields in an object:

- 15.Go to Task \rightarrow Fields & Relationships \rightarrow New.
- 16. Select Number \rightarrow Next.
- 17. Fill details:
 - Field Label: Number of People Served
 - Field Name: Number of People Served
 - Check Required
- 18. Click Next \rightarrow Next \rightarrow Save & New.

- 19.Go to Task \rightarrow Fields & Relationships \rightarrow New.
- 20. Select Text \rightarrow Next.

21. Fill details:

- Field Label: Name of the Person
- Field Name: Name_of_the_Person
- 22. Click Next \rightarrow Next \rightarrow Save & New.

To create another fields in an object:

- 23. Go to Task \rightarrow Fields & Relationships \rightarrow New.
- 24. Select Phone \rightarrow Next.
- 25. Fill details:
 - Field Label: Phone
 - Field Name: Phone
- 26. Click Next \rightarrow Next \rightarrow Save & New.

To create another fields in an object:

- 27. Go to Task \rightarrow Fields & Relationships \rightarrow New.
- 28. Select Picklist \rightarrow Next.
- 29. Fill details:
 - Field Label: Rating
 - Field Name: Rating
 - Values
 - 1
 - 2
 - 3
 - 4
 - 5
- 30. Click Next \rightarrow Next \rightarrow Save & New.

- 31. Go to Task \rightarrow Fields & Relationships \rightarrow New.
- 32. Select Long Text Area \rightarrow Next.

33. Fill details:

- Field Label: Feedback
- Field Name: Feedback
- 34. Click Next \rightarrow Next \rightarrow Save & New.

Activity 5: Creation of Fields for the Volunteer Object:-

- 1. Setup \rightarrow Object Manager \rightarrow Search Volunteer \rightarrow Click.
- 2. Go to Fields & Relationships \rightarrow Click New.
- 3. Select Auto Number → Click Next.
- 4. Fill details:
 - Field Label: Volunteer ID
 - Display Format: VOL-{000} (example, 001, 002, 003...)
 - Starting Number: 1
 - Field Name: Auto-generated
 - Tick Required checkbox.
- 5. Click Next \rightarrow Next \rightarrow Save & New.

To create another fields in an object:

- 6. Go to Fields & Relationships → Click New
- 7. Select Picklist \rightarrow Next.
- 8. Fill details:
 - Field Label: Gender
 - Field Name: Gender
 - Values (each in new line):
 - o Male
 - o Female
 - Keep Use first value as default if needed.
- 9. Next \rightarrow Next \rightarrow Save & New.

- 10. Click New \rightarrow Select Date \rightarrow Next.
- 11. Fill details:
 - Field Label: Available On
 - Field Name: Available_On
 - Tick Required checkbox.
- 12. Next \rightarrow Next \rightarrow Save & New.

To create another fields in an object:

- 13. Click New \rightarrow Select Number \rightarrow Next
- 14. Fill details:
 - Field Label: Age
 - Field Name: Age
 - Tick Required checkbox
 - Decimal Places = 0
- 15. Next \rightarrow Next \rightarrow Save & New.

To create another fields in an object:

- 16. Click New \rightarrow Select Email \rightarrow Next.
- 17. Fill details:
 - Field Label: Email
 - Field Name: Email
 - Tick Required checkbox.
- 18. Next \rightarrow Next \rightarrow Save & New.

- 19. Click New \rightarrow Select Number \rightarrow Next.
- 20. Fill details:
 - Field Label: Contact Number
 - Field Name: Contact_Number
 - Tick Required checkbox.

- Decimal Places = 0
- Length = 10 (Indian mobile format).
- 21. Next \rightarrow Next \rightarrow Save & New.

To create another fields in an object:

- 22. Click New \rightarrow Select Text Area (Long) \rightarrow Next.
- 23. Fill details:
 - Field Label: Address
 - Field Name: Address
 - Set length = 255 characters (default ok).
- 24. Next \rightarrow Next \rightarrow Save & New.

To create another fields in an object:

- 25. Click New \rightarrow Select Date \rightarrow Next.
- 26. Fill details:
 - Field Label: Date of Birth
 - Field Name: Date of Birth
 - Required = Optional (user's choice).
- 27. Next \rightarrow Next \rightarrow Save

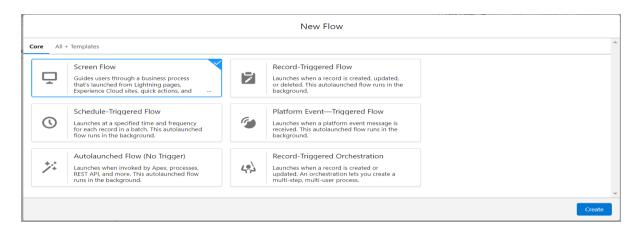

Activity 5: Creation of Fields for the Execution Details Object: -

- 1. Go to Setup \rightarrow open Object Manager \rightarrow search Volunteer \rightarrow click the object.
- 2. In left panel, click Fields & Relationships → click New.
- 3. From Data Types, select Auto Number \rightarrow click Next.
- 4. Fill details:
 - Field Label: Execution ID
 - Field Name: Auto generated
 - Tick Required checkbox
- 5. Click Next \rightarrow Next \rightarrow Save & New.

Milestone 6: FLOWS:-

Create Flow to create a Record in Venue Object:

- 1. Go to setup >> type Flow in quick find box >> Click on the Flow and Select the New Flow.
- 2. Select the Screen flow. Click on create.

- 3. Click on the '+' icon in between start and end, and click on the screen element.
- 4. Under the Screen Properties:
 - Label: Venue Details
 - API Name : Venue Details
- 5. Now let's add components in this flow. Click on Text Component and name it as:
 - Label: Venue Name
 - API Name : Venue Name
- 6. Click on Email Component and name it as:
 - Label: Email
 - API Name: Contact Email
- 7. Click on Phone Component and name it as:
 - Label: Phone
 - API Name: Contact Phone
- 8. Click on Text Component and name it as:

• Label: Venue Location

• API Name: Venue Location

9. Click on Number Component and name it as:

• Label: Latitude

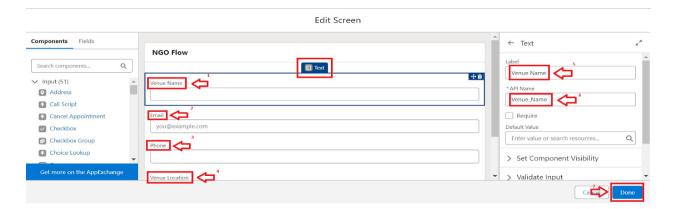

• API Name: Latitude

10. Click on Number Component and name it as:

• Label: longitude

• API Name: longitude

11. Next click on Done. This would like below

- 12. Click on the '+' icon in between Venue details and end, and click on create record element.
- 13. Now label it as
 - Label: Create Venue Record
 - API Name: Create Venue Record
 - How Many Records to Create: One
 - How to Set the Record Fields: Use separate resources, and literal values
 - Object : Venue
 - Set Field Values for the Venue : Click on 'Add Field' 5 times
 - Field: Value = Contact Email c: {!Contact Email.value}
 - Field: Value = Contact Phone c: {!Contact Phone.value}
 - Field : Value = Name : {!Venue Name}
 - Field: Value = Venue Location c: {!location}
 - Field: Value = Location Latitude s: {!latitude}
 - Field: Value = Location Longitude s: {!longitude}

14. This would look like:

Create a Record of This Object

* Object Venue			
Set Field Values for the Venue			
Field Contact_Emailc	←	Value Aa Contact_Email > Value X	â
Field Contact_Phone_c	←	Value Aa Contact_Phone > Value X	â
Field Name	←	Value Aa Venue_Name X	â
Field Venue_Locationc	←	Value A location X	

15. Click on Save as:

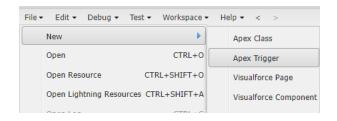

Flow Label: Venue Form

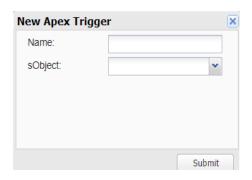

Flow API Name : Venue_Form

Milestone 7: TRIGGER:-

Activity 1: Create a Trigger:

- 1. Log in to Trailhead account → click Gear icon (top-right).
- 2. Select Developer Console → new console window opens.
- 3. In menu bar, go to File \rightarrow New \rightarrow Trigger.
- 4. Enter Trigger Name + Object → Save

5. Enter Name: DropOffTrigger

sObject: Drop-Off Point

6. Click on Submit.

Activity 2: Trigger Code:

(This Trigger is to assign the Distance field to the Distance Calculation field. So that we can assign the distance in the sharing rules.)

Code:

```
trigger DropOffTrigger on Drop_Off_point__c (before insert) {
  for(Drop_Off_point__c Drop : Trigger.new) {
     Drop.Distance__c = Drop.distance_calculation__c;
  }
}
```

Phase 4: Data Migration, Testing & Security

Milestone 8: PROFILES:-

- 1. Go to setup page >> type Profiles in Quick Find bar >> click on Profiles >> click on 'S'
- 2. Click on Clone beside Standard Platform User.
- 3. Under Clone Profile:

Profile Name: NGOs Profile

4. Then click on Save.

Milestone 9: CREATION OF USERS: -

In our Project we consider them as NGO's

Activity 1: Creation of User1: -

- 1. Go to setup page >> type users in Quick Find bar >> click on users>> New user.
- 2. In General Information give details as: (Note: create users as per your wish NGO's)
 - First Name: Iksha Foundation
 - Last Name: Iksha_Foundation 28
 - Alias: iiksh
 - Email: Give Your Email
 - Username: ikshafoundation@sb.com (give the username different)
 - Nickname: Auto Populated
 - User License: Salesforce Platform
 - Profile: NGOs Profile
 - Active: Check

3. Click on Save.

Activity 2: Creation of User2 and User3: -

- 1. Create another Two Users by following steps in Activity 1 with similar User License and Profile.
- 2. Give Different First Name, Last Name based on Different NGO's.

Milestone 10: PUBLIC GROUPS:-

Activity 1: Creation of Public Group 1:

1. Setup \rightarrow Quick Find \rightarrow Public Groups \rightarrow New

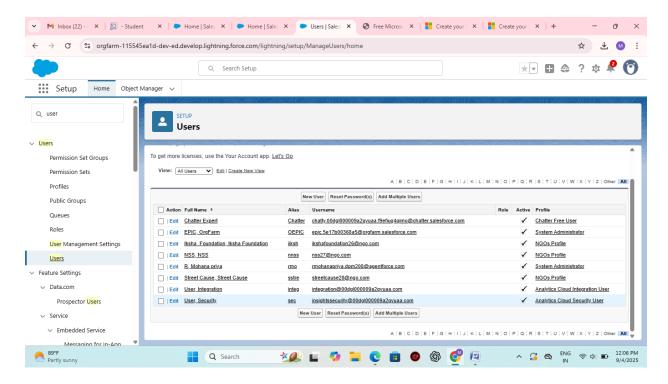

2. Group Info:

• Label: Iksha

Group Name: Iksha

Grant Access Using Hierarchies

3. Search: Users

4. Selected Members: Iksha Foundation, System Administrator

5.Click Save.

Activity 2: Creation of Public Group 2 and 3: -

- 1. By Following Steps in Activity 1, Create other two Public Groups for other two users.
- 2. After Saving this would look like this.

Milestone 11: REPORT TYPES: -

Activity 1: Creation of Venue with DropOff with Volunteer Reports:-

☐ Edit Login Iksha_Foundation, Iksha Foundation	<u>iiksh</u>	ikshafoundation@sb.com	✓	NGOs Profile
☐ Edit Login NSS, NSS	nnss	nss@sb.com	✓	NGOs Profile
☐ Edit Login Street Cause, Street Cause	<u>sstre</u>	streetcause@sb.com	✓	NGOs Profile

- 1. Setup \rightarrow Quick Find \rightarrow Report Types \rightarrow Continue \rightarrow New Custom Report Type
- 2. Fill report type details:
 - Primary Object: Venues
 - Report Type Label: Venue with DropOff with Volunteer
 - Report Type Name: Venue with DropOff with Volunteer
 - Description: Venue with DropOff with Volunteer
 - Category: Other Reports
 - Deployment Status: Deployed
- 3. Click Next.
- 4. Under object relationships:
 - Relate Drop-Off Points \rightarrow choose A records may or may not have related B records.
 - Again, relate Volunteers.
- 5. Click Save

Activity 2: Creation of Volunteers with Execution Details and Tasks:-

1. Setup \rightarrow Quick Find \rightarrow Report Types \rightarrow Continue \rightarrow New Custom Report Type

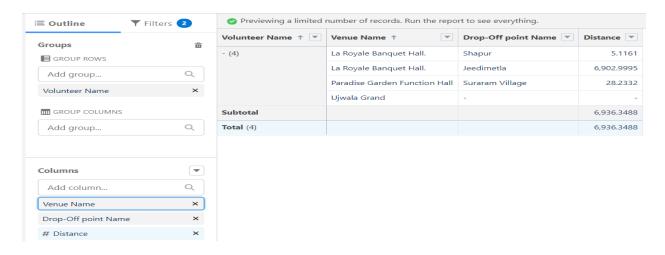

2. Define Report Type:

- Primary Object: Volunteer
- Report Type Label: Volunteers with Execution Details and Tasks
- Report Type Name: Volunteers with Execution Details and Tasks
- Description: Volunteers with Execution Details and Tasks
- Category: Other Reports
- Deployment Status: Deployed
- 3. Click Next
- 4. Relate another object → Execution Details
 - Choose: A records may or may not have related B records
- 5. Click Save.

Milestone 12: REPORTS: -

Activity 1: Creation of Report on Venue with DropOff with Volunteer: -

- 1. In FoodConnect App \rightarrow go to Reports tab.
- 2. Click New Folder \rightarrow
 - Label: Custom Reports
 - Unique Name: CustomReports
- 3. Open Custom Reports \rightarrow click New Report.
- 4. Select Report Type: Venue with DropOff with Volunteer \rightarrow Start Report.
- 5. Report Setup:
 - Group Rows: Volunteer Name
 - Columns: Venue Name, Drop-Off Point Name, Distance.

6. Click Save & Run \rightarrow

• Report Name: venue and Drop Off point

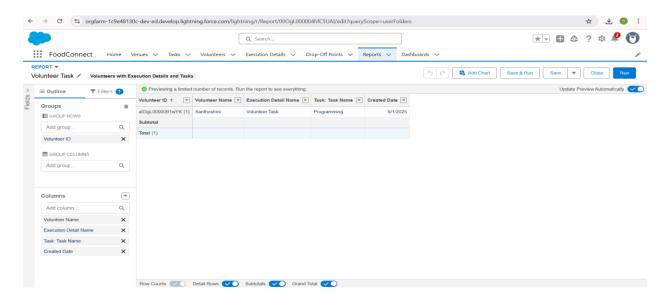

• Unique Name: Auto (default)

Folder: Custom Reports

7. Click Save.

Activity 2: Creation of Report on Volunteers with Execution Details and Tasks: -

- 1. In FoodConnect App \rightarrow go to Reports tab.
- 2. Open Custom Reports folder \rightarrow click New Report.
- 3. Select Report Type: Volunteers with Execution Details and Tasks → click Start Report.
- 4. Report Setup:
 - Group Rows: Volunteer ID
 - Columns:
 - Volunteer → Volunteer Name
 - \circ Task \rightarrow Task Name
 - Execution Detail → Execution Detail Name
 - Created Date

5. Click Save & Run \rightarrow

Report Name: Volunteer TaskUnique Name: Auto (default)

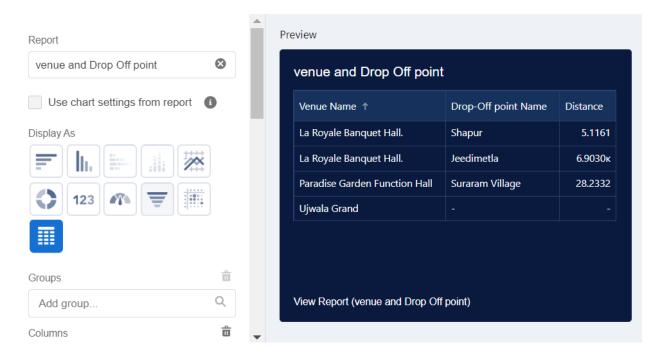

• Folder: Custom Reports

6. Click Save.

Milestone 12: DASHBOARDS:-

Activity 1: Adding venue and Drop Off point Report to the Dashboard:-

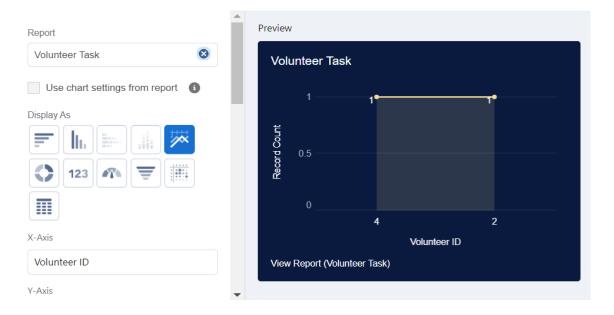

- 1. In FoodConnect App \rightarrow go to Dashboards tab.
- 2. Click New Folder →
 - Label: Custom Dashboards
 - Unique Name: Auto (default).
- 3. Open Custom Dashboards \rightarrow click New Dashboard.
 - Name: Organization Details
- 4. Add Component:
 - Click Widget → Chart/Table
 - Select Report: venue and Drop Off point Report → Select
 - Display As: Lightning Table
 - Theme: Dark (optional)

5. Click Save.

Activity 2: Adding Volunteer Task Report to the Dashboard: -

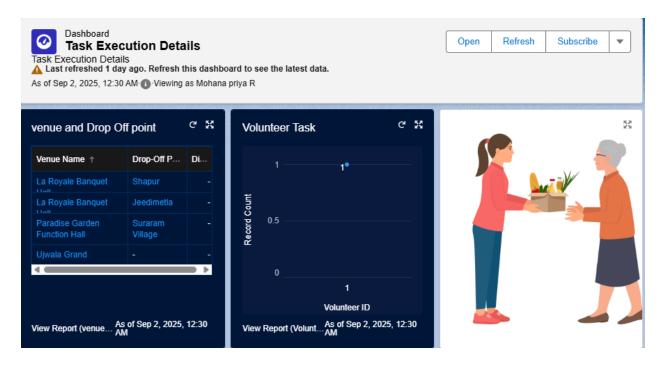

- 1. Click Widget \rightarrow Chart/Table.
- 2. In Select Report \rightarrow choose Volunteer Task Report \rightarrow click Select.
- 3. In Add Component:
 - Display As: Line Chart
 - Theme: Dark (optional)

4. Click Save.

Activity 3: Adding a Picture to the Dashboard (Optional): -

- 1. Download an image to your system.
- 2. In Dashboard \rightarrow Click Widget \rightarrow Image.
- 3. Click Browse Files \rightarrow select the picture \rightarrow Upload.
- 4. Save As: Task Execution Details
- 5. Folder: Custom Dashboards \rightarrow Select \rightarrow Save

Milestone 13: SHARING RULES: -

Drop-Off Point Sharing Rules Setup:

- 1. Setup \rightarrow Quick Find \rightarrow Sharing Settings
- 2. Scroll to Drop-Off Point Sharing Rules → click New

Rule 1

Label: Rule 1Name: Rule 1

Rule Type: Based on Criteria
Criteria: Distance: Less than:15
Share With: Public Group → Iksha

Share with: I done Group - II

• Save.

Rule 2

Label: Rule 2Name: Rule 2

• Rule Type: Based on Criteria

• Criteria: Distance: Greater than:15 AND Distance: Less than equal:30

• Share With: Public Group → NSS

• Save.

Rule 3

Label: Rule 3Name: Rule 3

• Rule Type: Based on Criteria

• Criteria: Distance: Greater than: 30 AND Distance: Less than equal:50

• Share With: Public Group → Street Cause

• Save.

Phase 5: Deployment, Documentation & Maintenance

Milestone 13: HOME PAGE: -

Activity 1: Creation of Home Page: -

- 1. Setup \rightarrow Quick Find \rightarrow Lightning App Builder \rightarrow New
- 2. Select Home Page \rightarrow Label: HOME Page \rightarrow choose Standard Home Page.
- 3. In Components:
 - Drag Flow to right section \rightarrow set Flow = Venue Flow
 - Drag Dashboard to first section
- 4. Click Save & Activation \rightarrow choose App Default \rightarrow Add Assignment \rightarrow select FoodConnect App \rightarrow Save
 - ➤ Now FoodConnect Home Page shows Venue Flow + Dashboard.

CONCLUSION: -

By leveraging the Salesforce platform, the project successfully created an efficient and transparent system for managing volunteers, venues, and task executions.

Through proper assignment of tasks, monitoring execution details, and ensuring smooth coordination, the project demonstrated how Salesforce CRM can be customized to support NGO operations effectively.

The project "To Supply Leftover Food to Poor using Salesforce" has been successfully implemented and demonstrates the practical application of Salesforce CRM for social good.

Project Achievements:

- Automated the process of volunteer registration, task allocation, and execution tracking.
- Enabled real-time data access for NGOs to monitor ongoing activities.
- Built custom objects, fields, Flows, and triggers for smooth automation.
- Improved reporting and transparency using Reports, Dashboards, and Sharing Rules.
- Enhanced usability through Lightning App, Home Page, and role-based access.

Student Learning Outcomes:

- Hands-on experience in Salesforce customization and development.
- Ability to solve real-world NGO management challenges using CRM.
- Gained teamwork experience in requirement gathering, analysis, and testing.
- Exposure to Salesforce project lifecycle and industry-relevant tools.

Future Scope:

- Integration with mobile apps for volunteers and NGOs for faster communication.
- Use of AI/analytics to monitor volunteer performance and predict NGO requirements.
- Expansion to manage multiple NGOs and regions in a single Salesforce org.
- Collaboration with government agencies and social organizations for larger outreach.
